MANNEQUINS

SUSTAINABILITY | NACHHALTIGKEIT

GenesisDisplay consider it their duty to act in an environmentally friendly manner in order to maintain the natural resources for the long term. The material for the production of shop window mannequins and displays largely consists of renewable raw materials. It does not contain petroleum like conventional materials used for the production of mannequins, but is produced by a natural fermentation process thus requiring less energy during production and generating less greenhouse gases. In addition, it reduces the mannequins' weight and makes them substantially tougher and more durable. As a result GenesisDisplay belongs to the most modern mannequin and display companies currently on the market.

GenesisDisplay sieht es als seine Pflicht, umweltbewusst zu handeln, um die natürlichen Ressourcen langfristig zu erhalten. Das Material für die Herstellung von Schaufensterfiguren und Displays besteht zu einem Großteil aus erneuerbaren Rohstoffen. Es enthält kein Petroleum, wie die gängigen Materialien, die zur Figurenherstellung verwendet werden, sondern wird durch einen Vergärungsprozess natürlich gewonnen. Dadurch wird weniger Energie bei der Herstellung benötigt und es werden weniger Treibhausgase produziert. Zusätzlich macht es die Figuren nicht nur leichter, sondern auch wesentlich widerstandsfähiger und damit langlebiger. Somit gehört GenesisDisplay zu den modernsten Figuren- und Display-Unternehmen, die zurzeit am Markt sind.
